Shah Dhruv

B.Tech Computer Science Engineering student
Uka Tarsadia University, Gujarat

dhruvshah1258@gmail.com | github.com/dhruv-projects

Summary

Second-year Computer Science Engineering student who learns by building. I have written C programs with file handling, built web projects in HTML, CSS and JavaScript, and recently started PHP and MySQL. Interested in software development, web development, Generative AI and emerging technologies.

Education

B.Tech, Computer Science Engineering
Uka Tarsadia University, Gujarat | Currently in second year

Projects

Expense Tracker with Charts HTML, CSS, JavaScript

- Web app to record income and expenses by category, date and amount, with totals for income, expenses and balance.
- Monthly totals and category breakdown charts, a month filter, and data saved in the browser with localStorage.
- Code: github.com/dhruv-projects/Expense-Tracker-with-Charts

Bank Account Management System C

- Menu-driven console application with 12 options: create account, deposit, withdraw, transfer, balance, history and statements.
- Binary file handling for storage, struct-based records, PIN verification with 3-attempt lockout, and rules such as minimum balance and daily withdrawal limit.
- Code organised into separate modules (account, transaction, display, utils) with a Makefile. Code: github.com/dhruv-projects/Bank-manager

Skills

Languages: C, Java, HTML5, CSS3, JavaScript, PHP and MySQL (recently learned)
Libraries: NumPy, Pandas
Tools and platforms: Git, GitHub, VS Code, IntelliJ IDEA, Linux

Experience

Self-directed development work

- Programmed in C, covering structures, file handling and modular code.
- Built projects in HTML, CSS and JavaScript and published the source on GitHub.

Certifications

Certificate of Participation, Prayatna 3.0 Hackathon
